OLD GUY RC
G Elias & Bro Airstport Coupe
Rudder Only Control
29.5" span. 212 sqin/1.47 sqft
6 oz all up weight

Original airplane was finished with black front fuselage, wing, rudder, stabilizer and fuselage was orange - lightly mist Rustoleum spray paint with primer from 12" away. t

Make a slit for wing supports to press into from bottom
They wont protrude from top side of wing

make half deep cuts along dotted lines
to form airfoil shape, bed down with tip
of glue gun, form bends , then glue and hold til set

Airfoil shape

Cut on bold line - glue between fusealge sides flush with top edges

Top fuselage cowling

Top fuselage deck

Make half deep cut
along dotted line to
form hinge

Turtle Deck
cut from card stock
and glue to top of
fuselage

wrap thread around popsicle stick and skewer position carefully and then glue

2-1/16"

CG

Card stock turtle deck

2-1/4"

Don't glue wing spars into fuselage until wing is mounted
leveled and angle adjusted as shown. Do this with wing
rubber banded in place and popsicle sticks just pushed in.
